

CP-230 (35MHz / 1mV Very High Sensitivity)

Feature :

- High sensitivity, low noise Probe for oscilloscope
- Sensitivity for full range as high as 1mV.
- Bandwidth DC to 35MHz.
- Raise time 10nS.
- Input impedance 1M ohm (fixed)
- Input capacitance 83pf (typical)
- Working voltage 300V CAT I, 150V CAT II
- Full length 1.2M
- New economic model, on sale at the moment.
