

Auto Battery Tester T807

Features :

- 1. suitable for 24V battery module
- 2. be able to input chassis number (only for T807C)
- 3. adopt conductance method to test
- be able to test various kinds of battery standard 100-1700CCA, 100-1000DIN, 100-1000IEC, 100-1700EN, JIS
- 5. Monitor the status of the start system of the vehicle
- 6. Test the change of the voltage when start the vehicle
- 7. Optional languages: Chinese, Traditional Chinese, English, Turkish, Korean, Dutch, etc.

Function:

- 1. battery test
- 2. start system test
- 3. charging system test
- 4. max. load test

Specifications :

- 1. suitable for 24V battery module
- 2. LCD display
- 3. test different battery standard
- 4. Power supply: powered by the battery
- 5. Test range of voltage: 6-30V
- 6. Dimension: 346 x 280 x 85 mm
